

# SANPAN 2500 RE

with IO ELITE PACKAGE

## Sanpan 2500RE with IO Elite package defines ultimate handling, style & entertainment in a luxury pontoon

The IO Elite package features unmatched seating, sound, and amenities that deliver an entertainment-driven pontoon. As the market demands upscale amenities and pontoons equipped with more horsepower, it's the perfect combination of superior ride and handling with a focus on style and function.

Ultimate flexibility is created by the Elite seating package to include versatile, convertible aft seating that inclines, reclines and folds down into spacious sun pad. A molded fiberglass structure, the aft seat base is designed with a stylish look in mind - a luxury typically reserved for high end cruisers.

A changing room uniquely incorporated into the aft seat structure allows for added space and comfort. An integrated swim platform features the optional Versa-Teak vinyl upgrade, a pop up ski tow and a fixed ladder that stow away when not in use. Underneath the deck, the full under deck skin and 6" lifting strakes provide an unsurpassed smooth and stable ride. With multiple IO engine choices, a power engine hatch lid and performance tube configuration this pontoon exceed expectations.

Elegant rails, and side panel graphics with raised chrome logo define a style all it's own inside this craft.

The amphitheater sound system is greatly enhanced by bringing the speakers out from the traditional under the seat placement to expand the sound on board. High output stereo systems with well thought out speaker placement result in optimal, open sound.
